COMFORT SYSTEMS USA, INC.

CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

March 31, 2004 (Unaudited)

1. Business and Organization

Comfort Systems USA, Inc., a Delaware corporation ("Comfort Systems" and collectively with its subsidiaries, the "Company"), is a national provider of comprehensive heating, ventilation and air conditioning ("HVAC") installation, maintenance, repair and replacement services within the mechanical services industry. The Company operates primarily in the commercial, industrial and institutional HVAC markets, and performs most of its services within office buildings, retail centers, apartment complexes, manufacturing plants, and healthcare, education and government facilities. In addition to standard HVAC services, the Company provides specialized applications such as building automation control systems, fire protection, process cooling, electronic monitoring and process piping. Certain locations also perform related activities such as electrical service and plumbing. Approximately 57% of the Company's consolidated 2004 revenues to date are attributable to installation of systems in newly constructed facilities, with the remaining 43% attributable to maintenance, repair and replacement services. The following service activities account for the Company's consolidated 2004 revenues to date: HVAC—75%, plumbing—13%, building automation control systems—6%, and other—6%. These service activities are within the mechanical services industry which is the single industry segment served by Comfort Systems.

2. Summary of Significant Accounting Policies

Basis of Presentation

These interim statements should be read in conjunction with the historical Consolidated Financial Statements and related notes of Comfort Systems included in the Annual Report on Form 10-K as filed with the Securities and Exchange Commission ("SEC") for the year ended December 31, 2003 (the "Form 10-K").

There were no significant changes in the accounting policies of the Company during the current period. For a description of the significant accounting policies of the Company, refer to Note 2 of Notes to Consolidated Financial Statements of Comfort Systems included in the Form 10-K.

The accompanying unaudited consolidated financial statements were prepared using generally accepted accounting principles for interim financial information and the instructions to Form 10-Q and applicable rules of Regulation S-X of the SEC. Accordingly, these financial statements do not include all the footnotes required by generally accepted accounting principles for complete financial statements, and should be read in conjunction with the Form 10-K. The Company believes all adjustments necessary for a fair presentation of these interim statements have been included and are of a normal and recurring nature. The results of operations for interim periods are not necessarily indicative of the results for the full fiscal year.

Cash Flow Information

Cash paid for interest for continuing and discontinued operations for the three months ended March 31, 2003 and 2004 was approximately \$0.4 million and \$0.1 million, respectively. Cash paid for income taxes for continuing operations for the three months ended March 31, 2003 and 2004 was approximately \$0.6 million and \$0.2 million, respectively. Cash paid for income taxes for discontinued operations for the three months ended March 31, 2003 and 2004 was approximately \$7.4 million and \$0.1 million, respectively. The cash tax payments for the three months ended March 31, 2003 include approximately \$10.4 million associated with the sale in 2002 of 19 operations to Emcor Group, Inc.

("Emcor"). These taxes are included in the caption "Taxes paid related to the sale of businesses" in the accompanying Consolidated Statement of Cash Flows.

New Accounting Pronouncements

In January 2003, the Financial Accounting Standards Board ("FASB") issued Interpretation No. 46, "Consolidation of Variable Interest Entities" ("FIN 46"). FIN 46 defines a variable interest entity as an entity in which equity investors do not have the characteristics of a controlling financial interest or do not have sufficient equity at risk for the entity to finance its activities without additional financial support from other parties. FIN 46 requires an investing entity to consolidate a variable interest entity if that investing entity will absorb a majority of the variable interest entity's expected losses if they occur, receive a majority of the variable interest entity's expected residual returns if they occur, or both. FIN 46 is effective for all new variable interest entities created or acquired after January 31, 2003. For variable interest entities created or acquired prior to February 1, 2003, the provisions of the pronouncement were initially to be effective for the first interim or annual period beginning after June 15, 2003. However, in October 2003, the FASB delayed the effective date of FIN 46 for these entities to the first period ending after March 15, 2004. The Company determined that it does not have any variable interest entities.

Segment Disclosure

Comfort Systems' activities are within the mechanical services industry which is the single industry segment served by the Company. Under Statement of Financial Accounting Standards ("SFAS") No. 131, "Disclosures About Segments of an Enterprise and Related Information," each operating subsidiary represents an operating segment and these segments have been aggregated, as no individual operating unit is material and the operating units meet a majority of the aggregation criteria.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires the use of estimates and assumptions by management in determining the reported amounts of assets and liabilities, revenues and expenses and disclosures regarding contingent assets and liabilities. Actual results could differ from those estimates. The most significant estimates used in the Company's financial statements include revenue and cost recognition for construction contracts, allowance for doubtful accounts, self-insurance accruals and the quantification of fair value for reporting units in connection with the Company's goodwill impairment testing.

Stock-Based Compensation

The Company accounts for its stock-based compensation using the intrinsic value method under Accounting Principles Board Statement No. 25, "Accounting for Stock Issued to Employees" ("APB 25"). Under this accounting method, no expense in connection with the Company's stock option plans is recognized in the consolidated statements of operations when the exercise price of the stock options is greater than or equal to the value of the Common Stock on the date of grant. In October 1995, the FASB issued SFAS No. 123, "Accounting for Stock-Based Compensation," which requires that if a company accounts for stock-based compensation in accordance with APB 25, the company must also disclose the effects on its results of operations as if an estimate of the value of stock-based compensation at the date of

grant was recorded as an expense in the Company's statement of operations. These effects for the Company are as follows (in thousands, except per share data):

	March 31,			
	2003		2004	
Net Income (Loss) as reported	\$ (4,816)	\$	1,043	
Add: Stock-based compensation included in reported net income, net of tax	(5)		34	
Less: Compensation expense per SFAS No. 123, net of tax	(701)		(443)	
Pro forma Net Income (Loss)	\$ (5,522)	\$	634	
Net Income (Loss) Per Share—Basic				
Net Income (Loss) per share as reported	\$ (0.13)	\$	0.03	
Pro forma Net Income (Loss) per share	\$ (0.15)	\$	0.02	
Net Income (Loss) Per Share—Diluted				
Net Income (Loss) per share as reported	\$ (0.13)	\$	0.03	
Pro forma Net Income (Loss) per share	\$ (0.15)	\$	0.02	

Stock Option Plans—The effects of applying SFAS No. 123 in the pro forma disclosure may not be indicative of future amounts, as additional option awards in future years are anticipated. The Company did not grant any options during the three months ended March 31, 2003 or 2004, respectively.

Reclassifications

Certain reclassifications have been made in prior period financial statements to conform to current period presentation. These reclassifications have not resulted in any changes to previously reported net income for any periods.

3. Discontinued Operations

Individual Sales of Operating Companies—During the fourth quarter of 2003, the Company sold a small operating company. This unit's after-tax income of \$0.1 million for the quarter ended March 31, 2003 has been reported in discontinued operations under "Operating income, net of income tax expense." As a result of the sale of this unit in the fourth quarter of 2003, the Company recorded a loss of \$1.5 million, net of tax benefit, in discontinued operations under "Estimated loss on disposition, including income tax expense." The loss resulted from the non-cash write-off of nondeductible goodwill.

During the third quarter of 2003, the Company committed to a plan to divest of a small operating company. This unit's after-tax income of less than \$0.1 million for the quarter ended March 31, 2003 has been reported in discontinued operations under "Operating income, net of income tax expense." As a result of the decision in the third quarter of 2003 to sell this unit, the Company recorded an estimated loss of \$2.8 million, including taxes, related to this planned disposition in discontinued operations under "Estimated loss on disposition, including income tax expense" based upon an estimated sales price. The final loss as measured at the closing of this sale in the fourth quarter of 2003 was not materially different than the estimate recorded in the preceding quarter. The estimated loss resulted from the non-cash write-off of nondeductible goodwill.

During the second quarter of 2003, the Company sold a small operating company. This unit's after-tax income of \$0.1 million for the quarter ended March 31, 2003 has been reported in discontinued operations under "Operating income, net of income tax expense." As a result of the decision in the first quarter of 2003 to sell this unit, the Company recorded an estimated loss in the first quarter of 2003 of \$0.9 million, including tax expense, related to this transaction in discontinued operations under "Estimated loss on disposition, including income tax expense." The final loss as measured at the closing of this sale in the second quarter of 2003 was not materially different than the estimate recorded in the preceding quarter. The loss resulted from the non-cash write-off of nondeductible goodwill.

Revenues and pre-tax income related to 2003 discontinued operations were as follows (in thousands):

	_	Three Months Ended March 31, 2003
Revenues	\$	4,284
Pre-tax income	\$	361

Sale of Companies to Emcor—On March 1, 2002, the Company sold 19 operations to Emcor Group, Inc. ("Emcor"). The total purchase price was \$186.25 million, including the assumption by Emcor of approximately \$22.1 million of subordinated notes to former owners of certain of the divested companies. The Company realized an aggregate loss of \$11.8 million, including related tax expense, in connection with the sale of these operations. As a result of the adoption of SFAS No. 142, "Goodwill and Other Intangible Assets," the Company also recognized a goodwill impairment charge related to these operations of \$32.4 million, net of tax benefit, as of January 1, 2002.

The transaction with Emcor provided for a post-closing adjustment based on a final accounting, done after the closing of the transaction, of the net assets of the operations that were sold to Emcor. That accounting indicated that the net assets transferred to Emcor were approximately \$7 million greater than a target amount that had been agreed to with Emcor. In the second quarter of 2002, Emcor paid the Company that amount, and released \$2.5 million that had been escrowed in connection with this element of the transaction.

Of Emcor's purchase price, \$5 million was deposited into an escrow account to secure potential obligations on the Company's part to indemnify Emcor for future claims and contingencies arising from events and circumstances prior to closing, all as specified in the transaction documents. Of this escrow, \$4 million has been applied in determining the Company's liability to Emcor in connection with the settlement of certain claims as described subsequently in this section. The remaining \$1 million of escrow is available for book purposes to apply to any future claims and contingencies in connection with this transaction, and has not been recognized as part of the Emcor transaction purchase price.

The net cash proceeds of approximately \$150 million received to date from the Emcor transaction were used to reduce the Company's debt. The Company paid \$10.4 million of taxes related to this transaction in March 2003.

In the fourth quarter of 2002, the Company recognized a charge of \$1.2 million, net of tax benefit of \$2.7 million, in discontinued operations under "Estimated loss on disposition, including income tax expense" in connection with the Emcor transaction. This charge primarily relates to a settlement with Emcor for reimbursement of impaired assets and additional liabilities associated with the operations acquired from the Company. Under this settlement, the Company was released from liability on all other

outstanding receivables and issues relating to the profitability of projects that were in process at the time Emcor acquired these operations. During May 2003, the Company paid \$2.7 million in cash to Emcor associated with this settlement. The settlement agreement also included the use of \$2.5 million of the \$5 million escrow described above to fund settled claims. The Company further recognized an additional \$1.5 million of the remaining escrow applicable to elements of the settlement still to be funded, of which \$0.8 million was paid from escrow during September 2003. Accordingly, for book purposes, \$1.0 million of escrow remains available to apply against future claims that may arise from Emcor in connection with this transaction. The Company recorded a tax benefit of \$1.4 million related to this additional charge. In addition, the \$1.2 million charge recognized during the fourth quarter of 2002 is also net of a tax credit of \$1.3 million as a result of lower final tax liabilities in connection with the overall Emcor transaction than were estimated when the transaction originally closed in the first quarter of 2002.

4. Restructuring Charges

During the first three quarters of 2003, the Company recorded restructuring charges of approximately \$3.2 million pre-tax. These charges included approximately \$1.5 million for severance costs and retention bonuses primarily associated with the curtailment of the Company's energy efficiency marketing activities, a reorganization of the Company's national accounts operations as well as a reduction in corporate personnel. The severance costs and retention bonuses related to the termination of 88 employees, all of whom had left the Company by December 31, 2003. The restructuring charges for this period also included approximately \$1.6 million for remaining lease obligations and \$0.1 million of other costs recorded in connection with the actions described above.

During the first quarter of 2002, the Company recorded restructuring charges primarily associated with the reduction in corporate office overhead in light of the Company's smaller size following the Emcor transaction described in Note 3, "Discontinued Operations," and decisions to merge or close three smaller divisions and realign regional operating management. During the second half of 2000, the Company recorded restructuring charges primarily associated with the consolidation, sale, or closure of certain underperforming operations and with its decision to cease e-commerce activities at Outbound Services, a subsidiary of the Company. As of December 31, 2003 and March 31, 2004, accrued lease termination costs of \$0.6 million and \$0.5 million, respectively, remain that were associated with the restructuring charges recorded during 2002 and 2000.

The following table shows the remaining liabilities associated with the cash portion of the restructuring charges as of December 31, 2003 and March 31, 2004 (in thousands):

	nce at g of Period	Additions		Additions Payments		Payments		Balance at End of Period	
Year Ended December 31, 2003:									
Severance	\$ _	\$	1,506	\$	(1,506)	\$	_

				_					
Total	\$ 1,000	\$	3,222	\$	(2,477)	\$	1,745		
Three Months Ended March 31, 2004:									
Lease termination costs and other	\$ 1,745	\$	_	\$	(450)	\$	1,295		
	9								

5. Long-Term Debt Obligations

Long-term debt obligations consist of the following (in thousands):

	ember 31, 2003	March 200	
Revolving credit facility	\$ — :	\$	_
Term loan	10,000		10,000
Other	403		382
Total debt	10,403		10,382
Less—current maturities	(1,594)		(2,090)
Total long-term portion of debt	\$ 8,809	\$	8,292

Credit Facility

On December 31, 2003, the Company entered into a \$50 million senior credit facility (the "Facility") provided by a syndicate of four banks. The Facility consists of two parts: a term loan and a revolving credit facility.

The term loan under the Facility (the "Term Loan") is \$10 million, which the Company borrowed upon the closing of the Facility. The Term Loan must be repaid in quarterly installments over five years. The Facility requires prepayments of the Term Loan in certain circumstances. Proceeds in excess of \$1 million from the sale of an asset, or from a related series of asset sales, must be used to pay down the Term Loan. Asset sale proceeds of less than \$1 million must also be used to pay down the Term Loan unless they are reinvested in long-term assets within six months of being received. All principal payments under the Term Loan permanently reduce the original \$10 million capacity under this portion of the Facility.

The Facility also includes a three-year \$40 million revolving credit facility (the "Revolving Loan") available for borrowings or letters of credit. The Facility requires that borrowings outstanding under the Revolving Loan must be less than \$2 million for ten consecutive business days at least once during each year. The Company has already satisfied this condition for 2004.

Certain of the Company's vendors require letters of credit to ensure reimbursement for amounts they are disbursing on the Company's behalf, such as to beneficiaries under the Company's self-funded insurance programs. The Company has also occasionally used letters of credit to guarantee performance under its contracts and to ensure payment to its subcontractors and vendors under those contracts. The Company's lenders issue such letters of credit through the Revolving Loan portion of the Facility. A letter of credit commits the lenders to pay specified amounts to the holder of the letter of credit if the holder demonstrates that the Company has failed to perform specified actions. If this were to occur, the Company would be required to reimburse the lenders for amounts they fund to honor the letter of credit holder's claim. Absent a claim, there is no payment or reserving of funds by the Company in connection with a letter of credit. However, because a claim on a letter of credit would require immediate reimbursement by the Company to its lenders, letters of credit are treated as a use of Facility capacity just the same as actual borrowings. Depending on the circumstances of such a reimbursement, the Company may also have to record a charge to earnings for the reimbursement. Claims against letters of credit are rare in the Company's industry. The Company has never had a claim made against a letter of credit that resulted in

payments by the issuer of the letter of credit or by the Company. The Company believes that it is unlikely that it will have to fund claims under a letter of credit in the foreseeable future.

The Company's borrowings and letters of credit outstanding under the Facility at each monthend must be less than a borrowing base measured as of the same monthend. The borrowing base is defined under the Facility as 60% of the following: total trade receivables, less allowances for doubtful accounts, less receivables related to projects that are subject to payment or performance bonds. The borrowing base as of March 31, 2004 was \$77 million. The Company expects that its borrowing base will continue to exceed the \$50 million stated limit of the Facility by significant amounts.

The Company's borrowing and letter of credit capacity under the Revolving Loan portion of the Facility at any given time is \$40 million less borrowings and letters of credit outstanding, subject to the borrowing base described above. The Facility contains financial covenants defining various financial measures and the levels of these measures with which the Company must comply, as discussed below under Covenants and Restrictions. Covenant compliance is measured as of each quarterend. While the Facility's financial covenants do not specifically govern capacity under the Facility, if the Company's debt level under the Facility at a quarterend covenant compliance measurement date caused the Company to violate the Facility's debt-to-EBITDA covenant (described in more detail below) the Company's borrowing capacity under the Facility could be restricted by the lenders. Accordingly, available capacity amounts shown below are presented both on a financial covenant basis and on a Facility face value basis.

	As of March 31, 2004		Ap	As of ril 29, 2004
	(in thousands)			
Amounts Outstanding				
Revolving loan	\$	_	\$	_

Available Capacity				
Unused revolving loan and letter of credit capacity based on revolving loan				
face value of \$40 million	\$	19,501	\$	19,613
Unused revolving loan and letter of credit capacity based on quarterend debt-				
to-EBITDA covenant	\$	19,501		n/a

If the Company voluntarily terminates the Facility in full before December 31, 2004, it would owe the Facility's lenders a termination fee of \$500,000. The Company may voluntarily terminate the Facility in full on or after December 31, 2004 without a termination fee. Short of a full termination, the Company may not reduce the Revolving Loan commitment within the Facility prior to December 31, 2004. During the second year of the Facility, the Company may voluntarily reduce the Revolving Loan commitment by as much as \$5 million. During the third year of the Facility, the Company may voluntarily reduce the Revolving Loan commitment by as much as \$10 million, less any reductions it made prior to the third year of the Facility.

Collateral

The Facility is secured by first liens on substantially all the assets of the Company except for assets related to projects subject to surety bonds. The Facility is secured by a second lien on these assets, which are discussed further below. The Company's assets are primarily held by its subsidiaries. Accordingly, the Facility is also secured by the capital stock of current and future subsidiaries, and these entities guarantee repayment of amounts due under the Facility.

A common practice in the Company's industry is the posting of payment and performance bonds with customers. These bonds are offered by financial institutions known as sureties, and provide assurance to the customer that in the event the Company encounters significant financial or operational difficulties, the surety will arrange for the completion of the Company's contractual obligations and for the payment of the Company's vendors on the projects subject to the bonds. In cooperation with its lenders, the Company has granted its surety a first lien on assets such as receivables, costs incurred in excess of billings, and equipment specifically identifiable to projects for which bonds are outstanding, as collateral for potential obligations under bonds. As of March 31, 2004, the amount of these assets was approximately \$38.6 million.

Interest Rates and Fees

The Company has a choice of two interest rate options for borrowings under the Facility. Under one option termed the Base Rate Option, the interest rate is determined based on the higher of the Federal Funds Rate plus 0.5% or the prime lending rate offered by Citibank, N.A. (not one of the banks providing the Facility to the Company). Additional margins are then added to the higher of these two rates for Term Loan and Revolving Loan borrowings respectively. These additional margins are determined based on the ratio of the Company's total debt outstanding as of a given quarterend to its earnings before interest, taxes, depreciation and amortization ("EBITDA") for the twelve months ending as of that quarterend, as shown below. EBITDA as defined under the Facility is discussed in more detail below under *Covenants and Restrictions*.

Under the other interest rate option termed the Eurodollar Rate Option, borrowings bear interest based on designated one to six-month Eurodollar rates that correspond very closely to rates described in various general business media sources as the London Interbank Offered Rate or "LIBOR." Additional margins are then added to LIBOR for Term Loan and Revolving Loan borrowings respectively, based on the Company's ratio of debt to EBITDA, as shown below.

Letter of credit fees under the Facility are also based on the Company's ratio of debt to EBITDA, as shown below.

The interest rates underlying the Base Rate and Eurodollar Rate Options under the Facility are floating rates determined by the broad financial markets, meaning they can and do move up and down

from time to time. For illustrative purposes, the following are the respective market rates as of March 31, 2004 relating to interest options under the Facility:

Base Rate Option—The higher of:			
Federal Funds Rate plus 0.50%			1.50%
Citibank, N.A. Prime Rate			4.00%
Eurodollar Rate Option			
One-month LIBOR			1.09%
Six-month LIBOR			1.16%
	I	Debt to EBITDA	
	Less than 0.75	0.75 to 1.50	1.50 or greater
Additional Per Annum Interest			
Margin Added Under:			
Term Loan—			
Base Rate Option	1.75%	2.25%	2.75%
Eurodollar Rate Option	2.75%	3.25%	3.75%
Revolving Loan—			
Base Rate Option	1.50%	2.00%	2.50%
Eurodollar Rate Option	2.50%	3.00%	3.50%
Per Annum Letter of Credit Fees (not added to underlying Base			
, , , , ,			

The Facility provides that the interest rate margins and fees associated with a ratio of debt to EBITDA of 0.75 to 1.50 will be in effect through June 30, 2004 regardless of the Company's actual debt to EBITDA ratio during that time.

Commitment fees of 0.375% per annum are payable on the portion of Revolving Loan capacity not in use for borrowings or letters of credit at any given time.

The Company incurred approximately \$1.2 million in financing and professional costs in connection with the arrangement and the closing of the Facility. These costs will be amortized to interest expense over the term of the Facility in the amount of approximately \$0.4 million per year for the first three years of the Facility, and less than \$0.1 million per year during the fourth and fifth years of the Facility. To the extent prepayments of the Term Loan are made or the size of the Facility is reduced, the Company may have to accelerate amortization of these deferred financing and professional costs.

The weighted average interest rate that the Company currently pays on borrowings under the Facility is 5.12% per annum. This reflects a combination of borrowings under both interest rate options described above, as well as a transaction in which the interest rate relating to \$10 million in principal value of debt was fixed at 5.12% through early July, 2004. These rates do not include amortization of debt financing and arrangement costs or mark-to-market adjustments for derivatives.

Covenants and Restrictions

The Facility contains financial covenants defining various financial measures and the levels of these measures with which the Company must comply. Covenant compliance is assessed as of each quarterend. EBITDA is defined under the Facility for financial covenant purposes as net earnings for the four quarters ending as of any given quarterly covenant compliance measurement date, plus the corresponding amounts for (a) interest expense; (b) income taxes; (c) depreciation and amortization; and (d) other non-cash charges. The Facility also stipulates EBITDA for the first three quarters of 2003 as follows: (\$2.8) million for the first quarter; \$5.7 million for the second quarter; and \$8.0 million for the third quarter. The Facility's principal financial covenants include:

Debt Service Coverage Ratio—The Facility requires that the ratio of EBITDA to the sum of interest expense and scheduled principal payments be at least 2.50. Interest expense is defined under the Facility for purposes of this covenant as interest expense for the four quarters ending as of any given quarterly covenant compliance measurement date, excluding corresponding twelve-month amounts for (a) amortization of deferred debt arrangement costs; and (b) mark-to-market interest expense. Scheduled principal payments for this ratio are also measured for the twelve months ending as of any given quarterly covenant compliance measurement date. The Facility provides, however, that during the first three quarters of 2004, interest expense and scheduled principal payments used in this ratio will be the annualized amounts of actual year-to-date interest expense and scheduled principal payments, instead of actual amounts for these items for the twelve months then ended. The Company's debt service coverage ratio as of March 31, 2004 as measured under this covenant was 6.21.

Tangible Net Worth—The Facility requires that the Company's tangible net worth not be less than the sum of (a) \$75.4 million; (b) 75% of net income earned beginning October 1, 2003; and (c) the net proceeds of any equity transactions. For purposes of this ratio, the Facility defines tangible net worth as stockholders equity less the book value of the following intangible assets: goodwill, patents, copyrights, licenses, franchises, trade names, trade secrets, and operating leases. The Facility also provides that for purposes of this ratio, net income excludes any goodwill impairment charges. The Company's tangible net worth as of March 31, 2004 as measured under this covenant was \$98.7 million, as compared to a covenant requirement of \$78.0 million.

Debt to EBITDA—The Facility requires that the Company's ratio of debt to EBITDA not exceed 2.0. The Company's debt-to-EBITDA ratio as of March 31, 2004 as measured under this covenant was 0.46.

Capital Expenditures—The Facility limits capital expenditures to \$8.0 million per year. The Company's capital expenditures during the three months ended March 31, 2004 were \$1.3 million.

Other Restrictions—The Facility prohibits payment of dividends and repurchase of shares by the Company, and limits non-Facility debt, capital lease obligations, acquisitions, investments, and sales of assets. The Facility also includes a customary provision under which the lenders may demand immediate repayment of borrowings and disposition of letters of credit if they conclude that the Company's business or financial position has suffered a material adverse change. However, the Facility does not include any mechanisms allowing the lenders immediate access to the Company's ongoing cash flow in the event of a default or an immediate repayment demand by the lenders. In view of the Company's financial position, and what management believes are its prospects for profitability and positive cash flow in the future, the Company believes that the probability that its lenders will invoke the Facility's material adverse change provision in the foreseeable future is remote. As a result, debt under the Facility is classified as long-term, other than amounts due within one year.

Interest Expense and Related Charges

The credit facility that preceded the Company's current one was in place from October, 2002 to December, 2003. Interest expense for the three months ended March 31, 2003 and 2004 included the following primary elements (in thousands):

		Three Months Ended March 31,			
		2003	2	2004	
Interest expense on borrowings and unused commitment fees	\$	324	\$	225	
Letter of credit fees		91		207	
Amortization of deferred debt arrangement costs		381		96	
Mark-to-market adjustments on derivatives		(246)		_	
	_				
Total	\$	550	\$	528	
	_				

When the Company's previous credit facilities were reduced in size or terminated, corresponding amounts of deferred debt arrangement costs were written off. During the three months ended March 31, 2003, the Company wrote off \$0.8 million of deferred financing fees due to a reduction in the size of the Company's credit facility. This charge is reported as "Write-off of debt costs" in the Company's consolidated statement of operations.

6. Commitments and Contingencies

Claims and Lawsuits

The Company is party to litigation in the ordinary course of business. The Company has estimated and provided accruals for probable losses and related legal fees associated with certain of these actions in the accompanying consolidated financial statements. The Company has one project-related claim that was subject to binding arbitration proceedings in the first half of 2004. The Company expects a final decision on this matter during the second quarter of 2004. With respect to this claim, and as with all such matters, the Company has accruals that reflect its judgment of the outcome. Because of this, in management's opinion, uninsured losses resulting from the ultimate resolution of these matters will not have a material adverse effect on the Company's operating results or financial condition.

Surety

Many customers, particularly in connection with new construction, require the Company to post performance and payment bonds issued by a financial institution known as a surety. These bonds provide a guarantee to the customer that the Company will perform under the terms of a contract and that the Company will pay subcontractors and vendors who provided goods and services under a contract. If the Company fails to perform under a contract or to pay subcontractors and vendors, the customer may demand that the surety make payments or provide services under the bond. The Company must reimburse the surety for any expenses or outlays it incurs. To date, the Company is not aware of any losses to its surety in connection with bonds the surety has posted on the Company's behalf, and does not expect such losses to be incurred in the foreseeable future.

Surety market conditions are currently difficult as a result of significant losses incurred by many sureties in recent periods, both in the construction industry as well as in certain larger corporate bankruptcies. As a result, less bonding capacity is available in the market and terms have become more restrictive. Further, under standard terms in the surety market, sureties issue bonds on a project-by-project basis, and can decline to issue bonds at any time. Historically, approximately 25% of the Company's business has required bonds. While the Company has enjoyed a longstanding relationship with its surety, current market conditions as well as changes in the surety's assessment of the Company's operating and financial risk could cause the surety to decline to issue bonds for the Company's work. If that were to occur, the alternatives include doing more business that does not require bonds, posting other forms of collateral for project performance such as letters of credit or cash, and seeking bonding capacity from other sureties. The Company would likely also encounter concerns from customers, suppliers and other market participants as to its creditworthiness. While the Company believes its general operating and financial performance would enable it to ultimately respond effectively to an interruption in the availability of bonding capacity, such an interruption would likely cause the Company's revenues and profits to decline in the near term.

Self-Insurance

The Company is substantially self-insured for worker's compensation, employer's liability, auto liability, general liability and employee group health claims, in view of the relatively high per-incident deductibles the Company absorbs under its insurance arrangements for these risks. Losses up to deductible amounts are estimated and accrued based upon known facts, historical trends and industry averages. A third-party actuary reviews these estimates annually.

7. Stockholders' Equity

Restricted Stock Grant

The Company awarded 200,000 shares of restricted stock to its Chief Executive Officer on March 22, 2002 under its 2000 Equity Incentive Plan. The shares were subject to forfeiture if the Company had not achieved certain performance levels for the twelve-month period ending March 31, 2003. These performance levels were met by the Company. The shares are subject to forfeiture if the executive leaves voluntarily or is terminated for cause. Such forfeiture provisions lapse pro rata over a four-year period that started on the date of grant.

The Company awarded 75,000 shares of restricted stock to its President on November 1, 2002 under its 2000 Equity Incentive Plan. The shares were subject to forfeiture if the Company had not achieved certain performance levels for the twelve-month period ending December 31, 2003. These performance levels were met by the Company. The shares are subject to forfeiture if the executive leaves voluntarily or is terminated for cause. Such forfeiture provisions lapse pro rata over a four-year period that started on the date of grant. This executive resigned from the Company in April 2004 and thus forfeited 56,250 shares of this restricted stock award.

Compensation expense relating to the grants will be charged to earnings over the respective four-year periods during which their forfeiture provisions lapse. The initial value of each award was established based on the market price on the date of grant, and was reflected as a reduction of stockholders' equity for unearned compensation at that time. This value, and the related compensation expense, was adjusted up or down based on the market price of the Company's stock during the first year following each respective

grant while the performance conditions were in effect. Once the performance conditions were met, the value of the award was fixed based on the market price of the Company's stock at that time, and is being charged to earnings over the remaining three-year period during which remaining forfeiture provisions lapse. Following the resignation of the Company's former President in April 2004, no further compensation expense in connection with his restricted stock award is being charged to earnings.

Warrant

In connection with a previous credit facility, the Company granted a lender a warrant to purchase 409,051 shares of Company common stock for nominal consideration. This warrant expires October 11, 2007. The warrant agreement also provides for the following:

- In most situations where the Company issues shares, options or warrants, the warrant holder may acquire additional shares or warrants on equivalent terms to maintain the proportionate interest its warrant shares represent in comparison to the Company's total shares outstanding.
- The warrant holder may require the Company to register its warrant shares.
- The warrant holder may include its warrant shares in any public offering of stock by the Company.
- The warrant holder may "put," or require the Company to repurchase, some or all of its warrant shares at the higher of market price, appraised price or book value per share if there is a change of control of the Company or a public offering of shares by the Company. If the warrant holder disposes of shares acquired and registered under this warrant, the warrant holder's put rights in connection with those shares expire.

This warrant included additional put rights when it was originally issued at the outset of the Company's previous credit facility. These additional put rights were waived when this credit facility was terminated in December 2003. The value of the warrant and put when originally issued of \$2.9 million was reflected as a discount of the Company's obligations under the previous credit facility, and as an obligation in long-term liabilities. With the termination of this credit facility, the discount reflected against debt under the facility was written off and included in "Write-off of debt costs and discount, net" in the Company's consolidated statement of operations. Due to the modification to the warrant and put agreement restricting the holder's ability to exercise the put provision, the Company recognized a \$1.3 million gain associated with the reduction in the value of the warrant and put obligation. This gain was also included in the "Write-off of debt costs and discount, net" caption. However, because the warrant and put remain outstanding, their remaining value continues to be reflected in long-term liabilities.

The value of this warrant and put will change over time, principally in response to changes in the market price of the Company's common stock. The warrant and the put qualify as a derivative for financial reporting purposes. Accordingly, such changes in the value of the warrant and put in any given period will be included in the Company's statement of operations for that period and in the Company's long-term liabilities, even though the warrant and put may not have been terminated and settled in cash during the period. Such adjustments are known as mark-to-market adjustments. During the three months ended March 31, 2003, these adjustments were a gain of \$0.2 million, and were included in interest expense as the warrant and put related to the Company's previous credit facility. Because the warrant and put do not relate to the Company's current credit facility, mark-to-market adjustments during the three months ended March 31, 2004, which were losses of \$0.7 million, are reflected as other income (expense) in the Company's statement of operations.

The table below provides an indication of the potential effect on the valuation of this derivative that might result from changes in the market price for the Company's stock. In this table, the value of the warrant has been calculated based upon the stock price being \$1 lower and \$1 higher than the Company's closing stock price at March 31, 2004 (value of warrant and put obligation in thousands).

Stock Price			Value of Warrant and Put Obligation				
\$	6.22	\$	2,644				
\$	7.22(a	a)\$	3,053				
\$	8.22	\$	3,462				

(a) This was the Company's closing stock price on March 31, 2004.

Restricted Common Stock

In March 1997, Notre Capital Ventures II, L.L.C. ("Notre") exchanged 2,742,912 shares of Common Stock for an equal number of shares of restricted voting common stock ("Restricted Voting Common Stock"). The holders of Restricted Voting Common Stock are entitled to elect one member of the Company's Board of Directors and to 0.55 of one vote for each share on all other matters on which they are entitled to vote. Holders of Restricted Voting Common Stock are not entitled to vote on the election of any other directors.

Each share of Restricted Voting Common Stock will automatically convert to Common Stock on a share-for-share basis (i) in the event of a disposition of such share of Restricted Voting Common Stock by the holder thereof (other than a distribution which is a distribution by a holder to its partners or beneficial owners, or a transfer to a related party of such holders (as defined in Sections 267, 707, 318 and/or 4946 of the Internal Revenue Code of 1986, as amended)), (ii) in the event any person acquires beneficial ownership of 15% or more of the total number of outstanding shares of Common Stock of the Company, or (iii) in the event any person offers to acquire 15% or more of the total number of outstanding shares of Common Stock of the Company. After July 1, 1998, the Board of Directors may elect to convert any remaining shares of Restricted Voting Common Stock into shares of Common Stock in the event 80% or more of the originally outstanding shares of Restricted Voting Common Stock have been previously converted into shares of Common Stock. As of March 31, 2004, there were 1,093,599 shares of Restricted Voting Common Stock remaining.

Earnings Per Share

Basic earnings per share ("EPS") is computed by dividing net income by the weighted average number of shares of common stock outstanding during the year. Diluted EPS is computed considering the dilutive effect of stock options, warrants and contingently issuable restricted stock.

Options to purchase 1.9 million shares of the Company's common stock ("Common Stock") at prices ranging from \$6.75 to \$21.438 per share were outstanding for the three months ended March 31, 2004, but were not included in the computation of diluted EPS because the options' exercise prices were greater than the average market price of the Common Stock.

Options to purchase \$5.4 million shares of Common Stock at prices ranging from \$2.14 to \$21.438 per share were outstanding for the three months ended March 31, 2003, but were not included in the computation of diluted EPS because the Company reported a loss from continuing operations during this

period. Under the calculations normally required by generally accepted accounting principles for determining EPS, including the effect of these options when the Company reports a loss would increase diluted EPS, or have an "anti-dilutive" effect. When this situation occurs, generally accepted accounting principles require that such options or other common stock equivalents be excluded from the determination of diluted EPS. Accordingly, they were excluded for the three months ended March 31, 2003. The Company would have included 67,590 shares related to the dilutive impact of stock options for the three months ended March 31, 2003 if it were not for the loss from continuing operations during the period.

The following table summarizes information regarding the Company's outstanding stock options as of March 31, 2003 and 2004:

	Number of Options Outsta			
Exercise Price	March 31, 2003	March 31, 2004		
\$1.90		872,000		
\$2.14	10,000	10,000		
\$2.19	10,000	10,000		
\$2.25	369,625	240,000		
\$2.34	52,000	2,000		
\$2.36	_	50,000		
\$2.43	10,000	10,000		
\$2.875	1,696,533	1,129,725		
\$3.39	110,000	110,000		
\$3.8125	500,000	500,000		
\$3.86	79,000	79,000		
\$4.18	_	102,500		
\$4.24	20,000	15,000		
\$4.77	40,000	40,000		
\$6.00	193,500	164,000		
\$6.75	10,000	5,000		
\$7.625	37,700	37,100		
All other outstanding options with prior grant dates with exercise prices ranging from \$11.75 to \$21.438	2,292,126	1,895,374		
	5,430,484	5,271,699		

As noted above, the Company issued a warrant to purchase 409,051 shares of Company common stock along with related put rights for nominal consideration. The dilutive impact of this warrant is computed assuming the issuance of shares equal to the value of the warrant obligation at the end of the reporting period, and excluding the income effect for the period of any mark-to-market adjustments made in connection with valuing the warrant. The put and warrant obligation had an anti-dilutive effect for the three months ended March 31, 2004, but a dilutive effect for the three months ended March 31, 2003.

The following tables reconcile the income (loss) from continuing operations and the net income (loss) on the statement of operations with the corresponding earnings (losses) that are used in computing basic and diluted earnings per share for each of the periods presented (in thousands):

	Three Months Ended March 31,			
		2003		2004
Income (loss) from continuing operations used in computing earnings per share—basic	\$	(4,131)	\$	1,043
Mark-to-market adjustment related to warrant and put obligation (after tax)		(246)		
Income (loss) from continuing operations used in computing earnings per share—diluted	\$	(4,377)	\$	1,043
	_			
Net income (loss) used in computing earnings per share—basic	\$	(4,816)	\$	1,043
Mark-to-market adjustment related to warrant and put obligation (after tax)		(246)		_
Net income (loss) used in computing earnings per share—diluted	\$	(5,062)	\$	1,043

The following table reconciles the number of shares outstanding with the number of shares used in computing basic and diluted earnings per share for each of the periods presented (in thousands):

	Three Mon Marc	
	2003	2004
Common shares outstanding, end of period(a)	37,616	38,293
Effect of using weighted average common shares outstanding	6	(157)
Shares used in computing earnings per share—basic	37,622	38,136
Effect of shares issuable under stock option plans based on the treasury stock method	_	1,151
Effect of shares issuable related to warrants	1,326	_
Effect of contingently issuable restricted shares	_	156
Shares used in computing earnings per share—diluted	38,948	39,443

⁽a) Excludes 275,000 and 156,250 shares of unvested contingently issuable restricted stock outstanding as of March 31, 2003 and 2004, respectively (see "Restricted Stock Grant" above).

COMFORT SYSTEMS USA, INC.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion should be read in conjunction with our historical Consolidated Financial Statements and related notes thereto included elsewhere in this Form 10-Q and the Annual Report on Form 10-K as filed with the Securities and Exchange Commission for the year ended December 31, 2003 (the "Form 10-K"). This discussion contains "forward-looking statements" regarding our business and industry within the meaning of the Private Securities Litigation Reform Act of 1995. These statements are based on our current plans and expectations and involve risks and uncertainties that could cause our actual future activities and results of operations to be materially different from those set forth in the forward-looking statements. Important factors that could cause actual results to differ include risks set forth in "Factors Which May Affect Future Results," included in our Form 10-K.

Introduction and Overview

We are a national provider of comprehensive heating, ventilation and air conditioning ("HVAC") installation, maintenance, repair and replacement services within the mechanical services industry. The services we provide address a very broad need, as air is circulated through almost all commercial, industrial and institutional buildings virtually year-round. We operate primarily in the commercial, industrial and institutional HVAC markets and perform most of our services within office buildings, retail centers, apartment complexes, manufacturing plants, and healthcare, education and government facilities. In addition to standard HVAC services, we provide specialized applications such as building automation control systems, fire protection, process cooling, electronic monitoring and process piping. Certain locations also perform related activities such as electrical service and plumbing.

Nature and Economics of Our Business

Approximately 80% of our revenues are earned on a project basis for installation of HVAC systems in newly constructed facilities or for replacement of HVAC systems in existing facilities. Customers hire us to ensure such systems deliver specified or generally expected heating, cooling, conditioning and circulation of air in a facility. This entails installing core system equipment such as packaged heating and air conditioning units, or in the case of larger facilities, separate core components such as chillers, boilers, air handlers, and cooling towers. We also typically install connecting and distribution elements such as piping and ducting. Our responsibilities usually require conforming the systems to pre-established engineering drawings and equipment and performance specifications, which we frequently participate in establishing. Our project management responsibilities include staging equipment and materials to project sites, deploying labor to perform the work, and coordinating with other service providers on the project, including any subcontractors we might use to deliver our portion of the work.

When competing for project business, we usually estimate the costs we will incur on a project, then propose a bid to the customer that includes a contract price and other performance and payment terms. Our bid price and terms are intended to cover our estimated costs on the project and provide a profit margin to us commensurate with the value of the installed system to the customer, the risk that project costs or duration will vary from estimate, the schedule on which we will be paid, the opportunities for other work that we might forego by committing capacity to this project, and other costs that we incur more broadly to support our operations but which are not specific to the project. Typically customers will seek bids from competitors for a given project. While the criteria on which customers select the winning bid vary widely and include factors such as quality, technical expertise, on-time performance, post-project support and service, and company history and financial strength, we believe that price is the most influential factor for most customers in choosing an HVAC installation and service provider.

After a customer accepts our bid, we generally enter into a contract with the customer that specifies what we will deliver on the project, what our related responsibilities are, and how much and when we will

be paid. Our overall price for the project is typically set at a fixed amount in the contract, although changes in project specifications or work conditions that result in unexpected additional work are usually subject to additional payment from the customer via what are commonly known as change orders. Project contracts typically provide for periodic billings to the customer as we meet progress milestones or incur cost on the project. Project contracts in our industry also frequently allow for a small portion of progress billings or contract price to be withheld by the customer until after we have completed the work, typically for six months. Amounts withheld under this practice are known as retention or retainage.

Labor and overhead costs account for the majority of our cost of service. Accordingly, labor management and utilization have the most impact on our project performance. Given the fixed price nature of much of our project work, if our initial estimate of project costs is wrong or we incur cost overruns that cannot be recovered in change orders, we can experience reduced profits or even significant losses on fixed price project work. We also perform some project work on a cost-plus or a time and materials basis, under which we are paid our costs incurred plus an agreed-upon profit margin. These margins are typically less than fixed-price contract margins because there is less risk of unrecoverable cost overruns in cost-plus or time and materials work.

As of March 31, 2004, we had 4,075 projects in process. Our average project takes three to six months to complete, with an average contract price of approximately \$229,000. Our projects generally require working capital funding of equipment and labor costs. Customer payments on periodic billings generally do not recover this investment until late in the job. Our average project duration together with typical retention terms as discussed above generally allow us to complete the realization of revenue and earnings in cash within one year. Because of the integral nature of HVAC and related controls systems to most buildings, we have the legal right in almost all cases to attach liens to buildings or related funding sources when we have not been fully paid for installing systems, except with respect to some government buildings. The service work that we do, which is discussed further below, usually does not give rise to lien rights.

We also perform larger HVAC projects. As of March 31, 2004, we had one project in process with a contract price of between \$15 and \$20 million, six projects between \$10 million and \$15 million, nine projects between \$5 million and \$10 million, and 153 projects between \$1 million and \$5 million. Taken together, projects with contract prices of \$1 million or more totaled \$469.3 million of aggregate contract value as of March 31, 2004, out of a total contract value for all projects in progress of \$934.4 million. Generally, projects closer in size to \$1 million will be completed in a year or less. It is unusual for us to work on a project that exceeds two years in length.

In addition to project work, we also provide maintenance and repair service on already-installed HVAC and controls systems. This kind of work usually takes from a few hours to a few days to perform. Prices to the customer are usually based on the equipment and materials used in the service as well as technician labor time. We usually bill the customer for service work when it is complete, typically with payment terms of up to thirty days. We also provide maintenance and repair service under ongoing contracts. Under these contracts, we are paid regular monthly or quarterly amounts and provide specified service based on customer requirements. These agreements typically cover periods ranging from one to three years and are cancelable on 30 to 60 days notice.

A relatively small but growing portion of our revenues comes from national and regional account customers. These customers typically have multiple sites, and contract with us to perform maintenance and repair service. These contracts may also provide for us to perform new or replacement systems installation. We operate a national call center to dispatch technicians to sites requiring service. We will also typically use proprietary information systems to maintain information on the customer's sites and equipment, including performance and service records, and related cost data. These systems track the status of ongoing service and installation work, and may also monitor system performance data. Under these contractual relationships, we usually provide consolidated billing and credit payment terms to the customer.

Profile and Management of Our Operations

Our company was originally formed in 1997 through an initial public offering, or IPO, and simultaneous acquisition of 12 companies engaged in our business. From the time we completed our IPO through December 1999, we acquired 107 HVAC and complementary businesses, of which 26 were "tuck-in" operations that were integrated upon acquisition with existing operations. Since we suspended our acquisition program in late 1999, we have sold or ceased operations at 34 companies. We have consolidated another 16 companies into other operations, such that today we have 43 operating units.

Beginning in the fourth quarter of 1999, we shifted our strategy from an emphasis on acquisition-based growth to a focus on improving the performance of our existing operations. Significantly, on March 1, 2002, we sold 19 operations to Emcor Group, Inc. for \$186.25 million, including Emcor's assumption of approximately \$22.1 million of subordinated notes to former owners of certain of the divested companies. We used the proceeds from this sale to reduce debt. The operating results of companies sold to Emcor have been reported under discontinued operations in the accompanying consolidated statements of operations. We recognized a loss, including taxes, of \$11.8 million and a goodwill impairment charge prior to the sale of \$32.4 million, net of taxes, related to the sold operations. For a further discussion of this sale, see Note 3, "Discontinued Operations," in the notes to the historical consolidated Financial Statements.

We manage our operations based on a variety of factors. Financial measures we emphasize include profitability, and use of capital as indicated by cash flow and by other measures of working capital principally involving project cost, billings and receivables. We also monitor selling, general, administrative and indirect project support expense, backlog, workforce size and mix, growth in revenues and profits, variation of actual project cost from original estimate, and overall financial performance in comparison to budget and updated forecasts. Operational factors we emphasize include project selection, estimating, pricing, management and execution practices, labor utilization, safety, training, and the make-up of both existing backlog as well as the business being pursued, in terms of project size, technical application and facility type, end-use customers and industries, and location of the work.

Most of our operations compete on a local or regional basis. Attracting and retaining effective operating unit managers is an important factor in our business, particularly in view of the relative uniqueness of each market and operation, the importance of relationships with customers and other market participants such as architects and consulting engineers, and the high degree of competition and low barriers to entry in most of our markets. Accordingly, we devote considerable attention to operating unit management quality, stability, and contingency planning, including related considerations of compensation, and non-competition protection where applicable.

Economic and Industry Factors

As an HVAC and building controls services provider, we operate in the broader nonresidential construction services industry and are affected by trends in this sector. While we do not have operations in all major cities of the US, we believe our national presence is sufficiently large that we experience trends in demand for and pricing of our services that are consistent with trends in the national nonresidential construction sector. As a result, we monitor the views of major construction sector forecasters along with macroeconomic factors they believe drive the sector, including trends in gross domestic product, interest rates, business investment, employment, demographics, and the general fiscal condition of federal, state and local governments. Although nonresidential construction activity has demonstrated periods of both significant growth and decline, it has grown at a compound annual rate of approximately 4.5% over the last two decades.

Spending decisions for building construction, renovation and system replacement are generally made on a project basis, usually with some degree of discretion as to when and if projects proceed. With larger amounts of capital, time, and discretion involved, spending decisions are affected to a greater degree by

uncertainty, particularly concerns about macroeconomic and geopolitical trends. We have experienced periods of time, such as after the terrorist incidents on September 11, 2001 in the US, and prior to and during the war in Iraq that occurred in early 2003, when uncertainty caused a significant slowdown in decisions to proceed with installation and replacement project work.

Most of the HVAC equipment we install is provided by four large manufacturers. We regularly seek the views of these manufacturers about trends in the commercial HVAC sector. We also evaluate HVAC equipment shipment statistics reported monthly by the Air Conditioning and Refrigeration Institute, which is the principal industry organization of HVAC equipment manufacturers. We believe that many owners of installed HVAC equipment have deferred maintenance and replacement activity during the very challenging economic conditions of the last several years. We also believe that this trend will not continue indefinitely due to the fundamental operating needs of the equipment. The large HVAC manufacturers have each made public statements supporting this view. However, there can be no assurance of whether or when we might actually experience increased demand for HVAC service and replacement.

Operating Environment and Management Emphasis

Nonresidential building construction and renovation activity, as reported by the Federal Government, has declined over the three year period of 2001 to 2003 in response to the broader US recession as well as uncertainty relating to international events. This has been a more extended period of contraction than the sector has experienced in other recent recessions, with particularly steep declines in the commercial and industrial portions of the industry. As a result, like most nonresidential HVAC service providers, we have experienced decreasing volume, prices, and therefore gross profits during this period. We have responded to these market challenges by pursuing work in sectors less affected by this downturn, such as government, educational, and health care facilities, and by establishing marketing initiatives that take advantage of our size and range of expertise. These initiatives include our regional and national multi-location service efforts, our energy efficiency capabilities, and collaboration among our operating units to seek joint project opportunities. As a result of these responses, the decreases we have seen in revenues over the last three years have been less than the overall decline in activity experienced by the broader nonresidential sector. We also responded to declining gross profits over recent years by reducing our selling, general, and administrative expenses, and our indirect project and service overhead costs. We believe our efforts in these areas have partially offset the decline in our profitability over this period. We began to see improvement in both industry activity as well as our own results in late 2003 and in the first quarter of 2004, as discussed further under "Results of Operations" below.

In addition to addressing revenues and costs more broadly, we also evaluate our operations on a by-unit and by-market basis. A number of our units have experienced significantly lower results at various points over the last three years, including ten units that incurred operating losses in 2003. While the difficult market conditions over this period of time certainly influenced the performance of these units, we also experienced operational execution shortfalls that contributed to lower results. The majority of such underperforming operations have been closed, sold, merged with stronger operations, or reduced in size or operating scope. We also replaced management at most ongoing operations in this group. We currently have 43 operating units. While it would be unusual in a group of this size to have no underperforming units even in better market conditions, we expect to have fewer units with significantly decreased operating results or losses in 2004 than we had in 2003. During the first quarter of 2004 we had four units that experienced operating losses which, for three of the units, were nominal. These units generally improved their results toward the end of the quarter.

With the difficult market conditions in our industry over recent years along with the integration challenges we encountered following our substantial acquisition growth of the late 90s, we also operated in an environment of relatively tight credit restrictions from our lenders. In addition, we have had to more actively manage our relationships with the surety market, through which we procure payment and performance bonds required for approximately 25% of our work. Accordingly, cash flow and debt

reduction have been particularly high priorities for us over this period of time. As a result of our sale of certain operations to Emcor in early 2002 as well as our continued strong emphasis on cash flow, our debt outstanding, net of cash, is now at a nominal level. At the end of 2003, we put a new credit facility in place with considerably less restrictive and more traditional terms than those of our previous facilities. Further, our surety relationships, while generally strong in the past, have improved. We have generated positive free cash flow in twelve of the last sixteen quarters, and will continue our emphasis in this area. However, we expect that we will have to devote noticeably fewer management and organizational resources to debt and capital structure matters in 2004 than we have in recent years.

As discussed at greater length in "Results of Operations" below, we see some signs of increased activity levels in our industry in 2004. We expect price competition to continue to be strong, as local and regional competitors respond cautiously to changing conditions. We will continue our efforts to find the more active sectors in our markets, and to increase our regional and national account business. However, our primary emphasis for 2004 will be on internal execution and margin improvement, rather than on revenue growth. In addition to the work we have done on our underperforming units as described above, we have increased our focus on project qualification, estimating, pricing and management, and on service performance. This focus includes significant increases in unit level training.

Based on indications of stabilizing industry conditions and on our emphasis on internal execution and margin improvement, we expect that our 2004 results will be significantly better than our 2003 results. Over the longer term, if industry conditions are stable to improving, we believe we will experience more periods of increased revenues. In addition, while we would not rule out growth by acquisition, particularly in view of how fragmented our industry is, we have no current acquisition plans, and believe it is likely that any acquisitions we might consider during 2004 would be relatively modest.

Critical Accounting Policies

In response to the Securities and Exchange Commission's Release No. 33-8040, "Cautionary Advice Regarding Disclosure About Critical Accounting Policies", we identified our critical accounting policies based upon the significance of the accounting policy to our overall financial statement presentation, as well as the complexity of the accounting policy and our use of estimates and subjective assessments. We have concluded that our most critical accounting policy is our revenue recognition policy. As discussed elsewhere in this report, our business has two service functions: (i) installation, which we account for under the percentage of completion method, and (ii) maintenance, repair and replacement, which we account for as the services are performed, or in the case of replacement, under the percentage of completion method. In addition, we identified other critical accounting policies related to our allowance for doubtful accounts receivable, the recording of our self-insurance liabilities, valuation of deferred tax assets and the assessment of goodwill impairment. These accounting policies, as well as others, are described in Note 2 to the Consolidated Financial Statements included in our Form 10-K.

Percentage of Completion Method of Accounting

Approximately 80% of our revenues were earned on a project basis and recognized through the percentage of completion method of accounting. Under this method as provided by American Institute of Certified Public Accountants Statement of Position 81-1, "Accounting for Performance of Construction-Type and Certain Production-Type Contracts," contract revenue recognizable at any time during the life of a contract is determined by multiplying expected total contract revenue by the percentage of contract costs incurred at any time to total estimated contract costs. More specifically, as part of the negotiation and bidding process in which we engage in connection with obtaining installation contracts, we estimate our contract costs, which include all direct materials (net of estimated rebates), labor and subcontract costs and indirect costs related to contract performance, such as indirect labor, supplies, tools, repairs and depreciation costs. Then, as we perform under those contracts, we measure such costs incurred, compare them to total estimated costs to complete the contract, and recognize a corresponding

proportion of contract revenue. This measurement and comparison process requires updates to the estimate of total costs to complete the contract, and these updates may include subjective assessments. Our contracts typically provide for a schedule of billings or invoices to the customer based on reaching agreed upon milestones or as we incur costs, although the billing schedule usually does not precisely match the schedule on which we incur costs. As a result, contract revenues recognized in the statement of operations can and usually do differ from amounts that can be billed or invoiced to the customer at any point during the contract.

The percentage of completion method of accounting is also affected by changes in job performance, job conditions, and final contract settlements. These factors may result in revisions to estimated costs and, therefore, revenues. Such revisions are frequently based on further estimates and subjective assessments. We recognize these revisions in the period in which they are determined. If such revisions lead us to conclude that we will recognize a loss on a contract, the full amount of the estimated ultimate loss is recognized in the period we reach that conclusion, regardless of the percentage of completion of the contract. Revisions to project costs and conditions can give rise to change orders under which the customer agrees to pay additional contract price. Revisions can also result in claims we might make against the customer to recover project variances that have not been satisfactorily addressed through change orders with the customer. We do not recognize revenues or margin based on change orders or claims until they have been agreed upon with the customer, with immaterial exceptions. Variations from estimated project costs could have a significant impact on our operating results, depending on project size, and the recoverability of the variation via additional customer payments.

Accounting for Allowance for Doubtful Accounts

We are required to estimate the collectibility of accounts receivable. Inherent in the assessment of the allowance for doubtful accounts are certain judgments and estimates including, among others, the creditworthiness of the customer, our prior collection history with the customer, the ongoing relationships with the customer, the aging of past due balances, our lien rights, if any, in the property where we performed the work, and the availability, if any, of payment bonds applicable to our contract. These estimates are re-evaluated and adjusted as additional information is received.

Accounting for Self-Insurance Liabilities

We are substantially self-insured for worker's compensation, employer's liability, auto liability, general liability and employee group health claims, in view of the relatively high per-incident deductibles we absorb under our insurance arrangements for these risks. Losses up to deductible amounts are estimated and accrued based upon known facts, historical trends and industry averages. A third party actuary reviews these estimates annually. We believe these accruals are adequate. However, insurance liabilities are difficult to estimate due to unknown factors, including the severity of an injury, the determination of our liability in proportion to other parties, timely reporting of occurrences, ongoing treatment or loss mitigation, general trends in litigation recovery outcomes and the effectiveness of safety and risk management programs. Therefore, if actual experience differs from the assumptions and estimates used for recording the liabilities, adjustments may be required and would be recorded in the period that the experience becomes known.

Accounting for Deferred Tax Assets

We regularly evaluate valuation allowances established for deferred tax assets for which future realization is uncertain. We perform this evaluation at least annually at the end of each fiscal year. The estimation of required valuation allowances includes estimates of future taxable income. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which the activity underlying these assets becomes deductible. We consider the scheduled reversal of deferred tax liabilities, projected future taxable income and tax planning strategies in making

this assessment. If actual future taxable income differs from our estimates, we may not realize deferred tax assets to the extent we have estimated.

Accounting for Goodwill and Other Intangible Assets

In most businesses we have acquired, the value we paid to buy the business was greater than the value of specifically identifiable net assets in the business. Under generally accepted accounting principles, this excess is termed goodwill and is recognized as an asset at the time the business is acquired. It is generally expected that future net earnings from an acquired business will exceed the goodwill asset recognized at the time the business is bought.

We are required to assess our goodwill asset amounts for impairment each year, and more frequently if circumstances suggest an impairment may have occurred. The new requirements for assessing whether goodwill assets have been impaired involve market-based information. This information, and its use in assessing goodwill, entails some degree of subjective assessment.

Results of Operations (in thousands):

Table 2—Supplemental Disclosure—Operating Income of Ongoing Operations Excluding Certain Items

The following table presents operating income excluding operations we have sold or shut down that did not qualify for presentation as discontinued operations under generally accepted accounting principles in our historical income statement. This table also excludes from operating income restructuring charges and goodwill impairment charges in 2003.

We have included this table because we believe it offers an additional view of the core results of our ongoing operations in a way we find useful in managing these operations, and in a way which also responds to frequent questions we receive about the Company from third parties. However, this presentation of operating income is not in accordance with generally accepted accounting principles, and should not be considered an alternative to operating income as determined under generally accepted accounting principles and presented above in Table 1—Historical Results. In particular, while this table excludes restructuring charges, we have recorded them in each of the last three years. In addition, impairment charges under the recently changed goodwill accounting rules are generally expected to occur periodically as goodwill recognized in connection with the acquisition of businesses responds over time to changes in those businesses' markets and operations.

Revenues increased \$13.6 million, or 7.5%, to \$193.2 million for the first quarter of 2004 compared to the same period in 2003. Excluding operations that were sold in 2003 and not reflected in discontinued operations, revenues increased 10.0% at ongoing operations. The gain in revenues stemmed primarily from our improving performance in the multi-family sector, which is currently very active, and from increased activity at our Washington DC and Orlando operations.

We also saw modest year-over-year revenue increases at our ongoing operations in the third and fourth quarters of 2003, following the three-year period of industry activity declines noted previously. We continue to see signs that activity levels in our industry may increase in 2004 as compared to the levels of the last three years. These observations are based on nonresidential construction spending trends, shipment data from HVAC equipment manufacturers, and anecdotal indications of renewed project consideration. In addition, we and other industry participants believe that there has been a general deferral of maintenance and replacement activity in the installed base of commercial, industrial, and institutional HVAC equipment, in response to the more difficult economy. We and other industry participants believe this trend will not continue indefinitely due to the fundamental operating needs of the equipment, but it is not clear when maintenance and replacement activity might increase. While we believe these trends and expectations are positive, there can be no assurance that industry activity levels will actually increase over the coming year. In view of the challenging economic environment and price competition affecting our industry, we may continue to experience only modest revenue growth or revenue declines in upcoming periods. In addition, if general economic activity in the US slows significantly from current levels, we may realize further decreases in revenue and lower operating margins.

Backlog primarily contains installation and replacement project work, and maintenance agreements. These projects generally last less than a year. Service work and short duration projects are generally billed as performed and therefore do not flow through backlog. Accordingly, backlog represents only a portion of our revenues for any given future period, and it represents revenues that are likely to be reflected in our operating results over the next six to twelve months. As a result, we believe the predictive value of backlog information is limited to indications of general revenue direction over the near term, and should not be interpreted as indicative of ongoing revenue performance over several quarters.

Backlog associated with continuing operations as of March 31, 2004 was \$473.2 million, a 17.2% increase from December 31, 2003 backlog of \$403.9 million, and a 2.8% increase from comparable March 31, 2003 backlog of \$460.1 million.

Gross Profit—Gross profit increased \$3.1 million, or 11.5%, to \$30.2 million for the first quarter of 2004 compared to the same period in 2003. As a percentage of revenues, historical gross profit for the first quarter of 2004 was 15.6%, up from 15.1% in the first quarter of 2003, and 15.4% for the same period at ongoing operations. This increase in gross profit percentage was driven primarily by significantly improved performance at our multi-family operations, better self insurance experience, and improvement in our Salt Lake City operations, offset to a lesser degree by some margin erosion in our San Diego operations and by reduced activity levels at our Syracuse operations following a strong 2003 in that market.

While our gross profit percentage increased in the first quarter, we see some factors that may put pressure on our gross profit percentage in upcoming periods. We would note that gross profit indications in our backlog are down somewhat from yearend. We believe there is a seasonal element in this decline as more larger projects book early in the year, and larger projects tend to have lower gross margins. However, we also believe these lower gross profit indications in backlog may also relate to ongoing, elevated price competition as many competitors may continue to price aggressively until they conclude improved conditions in our industry are more than temporary. Finally we would also note that like many other industries, ours has seen substantial price increases for and shortages of metal commodities such as steel, iron, and copper. We believe we have adequate reserves for all projects on which increased metal commodity prices may reduce our expected gross profit. We are also addressing metal commodity price escalation in all new project contracts. We continue to see generally positive activity trends in our industry, but based on these factors, we remain cautious about gross profit percentage going forward in 2004.

Selling, General and Administrative Expenses ("SG&A")—SG&A decreased \$3.3 million, or 10.8%, to \$27.2 million for the first quarter of 2004 compared to the same period in 2003. As a percentage of revenues, SG&A decreased from 17.0% in the first quarter of 2003 to 14.1% in the first quarter of 2004, and posted a similar decrease at ongoing operations. The decrease in SG&A primarily resulted from the following: (a) a broad-based cost reduction initiative that we undertook beginning in the second quarter of 2003; (b) consolidation of certain operating units, particularly in San Diego; and (c) the sale or closure of certain units that did not qualify for discontinued operations presentation.

Restructuring Charges—During the first quarter of 2003, we recorded restructuring charges of approximately \$1.2 million pre-tax. These charges included approximately \$0.8 million for severance costs and retention bonuses primarily associated with the curtailment of our energy efficiency marketing activities, a reorganization of our national accounts operations as well as a reduction in corporate personnel. The severance costs and retention bonuses related to the termination of 26 employees, all of whom had left the Company by March 31, 2003. The restructuring charges for this period also included approximately \$0.4 million for remaining lease obligations recorded in connection with the actions described above.

Interest Expense, Net—Interest expense, net for the three months ended March 31, 2003 and 2004 included the following primary elements (in thousands):

Three Months Ended

		March 31,		
	2003		2004	
Interest expense on borrowings and unused commitment fees	\$ 32	24 \$	225	
Letter of credit fees	Ó	91	207	
Amortization of deferred debt arrangement costs	38	31	96	
Mark-to-market adjustments on derivatives	(24	16)	_	
Interest income		(8)	(31)	
Total	\$ 54	12 \$	497	

Other Expense—Other expense was \$0.7 million for the first quarter of 2004 and \$0.2 million for the first quarter of 2003. First quarter 2004 includes a loss of \$0.7 million related to mark-to-market adjustments on the warrant and put obligation. First quarter 2003 includes a loss of \$0.3 million on the disposition of a division of one of our operations.

Write-off of Debt Costs—First quarter 2003 reflects a non-cash charge of \$0.8 million for deferred debt costs that were associated with previously higher levels of capacity under our previous credit facility.

Income Tax Expense (Benefit)—Our effective tax rates associated with results from continuing operations for the first quarter of 2003 and 2004, respectively, were 33.2% and 44.0% respectively. Our effective rate is generally higher than statutory rates because of the effect of certain expenses that we incur that are not deductible for tax purposes, and due to reserves that we have established against certain deferred tax assets based on the possibility that we will not be able to ultimately realize the tax benefit for certain losses we have incurred, primarily at the state income tax level. In addition, since our recent pre-tax profit margins have been relatively low on a historical and an absolute basis, the impact of non-deductible expenses on our effective rate is magnified. We currently expect our 2004 effective rate to be in the mid-40% range.

Discontinued Operations—Individual Sales of Operating Companies—During the fourth quarter of 2003, we sold a small operating company. This unit's after-tax income of \$0.1 million for the quarter ended March 31, 2003 has been reported in discontinued operations under "Operating results, net of tax." As a result of the sale of this unit, we recorded a loss of \$1.5 million, net of tax benefit, in discontinued operations under "Estimated loss on disposition, including tax." The loss resulted from the non-cash write-off of nondeductible goodwill.

During the third quarter of 2003, we committed to a plan to divest of a small operating company. This unit's after-tax income of less than \$0.1 million for the quarter ended March 31, 2003 has been reported in discontinued operations under "Operating results, net of tax." As a result of the decision in the third quarter of 2003 to sell this unit, we recorded an estimated loss of \$2.8 million, including taxes, related to this planned disposition in "Estimated loss on disposition, including tax" based upon an estimated sales price. The final loss as measured at the closing of this sale in the fourth quarter of 2003 was not materially different than the estimate recorded in the preceding quarter. The estimated loss resulted from the non-cash write-off of nondeductible goodwill.

During the second quarter of 2003, we sold a small operating company. This unit's after-tax income of \$0.1 million for the quarter ended March 31, 2003 has been reported in discontinued operations under "Operating results, net of tax." As a result of the decision in the first quarter of 2003 to sell this unit, we recorded an estimated loss in the first quarter of 2003 of \$0.9 million, including taxes, related to this transaction in "Estimated loss on disposition, including tax." The final loss as measured at the closing of

this sale in the second quarter of 2003 was not materially different than the estimate recorded in the preceding quarter. The loss resulted from the non-cash write-off of nondeductible goodwill.

Discontinued Operations—Sale of Companies to Emcor—On March 1, 2002, we sold 19 operations to Emcor Group. The total purchase price was \$186.25 million, including the assumption by Emcor of approximately \$22.1 million of subordinated notes to former owners of certain of the divested companies. We realized an aggregate loss of \$11.8 million, including related tax expense, in connection with the sale of these operations. As a result of the adoption of Statement of Financial Accounting Standards ("SFAS") No. 142, "Goodwill and Other Intangible Assets," we also recognized a goodwill impairment charge related to these operations of \$32.4 million, net of tax benefit, as of January 1, 2002.

The transaction with Emcor provided for a post-closing adjustment based on a final accounting, done after the closing of the transaction, of the net assets of the operations that were sold to Emcor. That accounting indicated that the net assets transferred to Emcor were approximately \$7 million greater than a target amount that had been agreed to with Emcor. In the second quarter of 2002, Emcor paid us that amount, and released \$2.5 million that had been escrowed in connection with this element of the transaction.

Of Emcor's purchase price, \$5 million was deposited into an escrow account to secure potential obligations on our part to indemnify Emcor for future claims and contingencies arising from events and circumstances prior to closing, all as specified in the transaction documents. Of this escrow, \$4 million has been applied in determining the Company's liability to Emcor in connection with the settlement of certain claims as described subsequently in this section. The remaining \$1 million of escrow is available for book purposes to apply to any future claims and contingencies in connection with this transaction, and has not been recognized as part of the Emcor transaction purchase price.

The net cash proceeds of approximately \$150 million received to date from the Emcor transaction were used to reduce our debt. We paid \$10.4 million of taxes related to this transaction in March 2003.

In the fourth quarter of 2002, we recognized a charge of \$1.2 million, net of tax benefit of \$2.7 million, in discontinued operations under "Estimated loss on disposition, including tax" in connection with the Emcor transaction. This charge primarily related to a settlement with Emcor for reimbursement of impaired assets and additional liabilities associated with the operations acquired from us. Under this settlement, we were released from liability on all other outstanding receivables and issues relating to the profitability of projects that were in process at the time Emcor acquired these operations from us. During May 2003, we paid \$2.7 million in cash to Emcor associated with this settlement. The settlement agreement also includes the use of \$2.5 million of the \$5 million escrow described above to fund settled claims. We further recognized an additional \$1.5 million of the remaining escrow applicable to elements of the settlement still to be funded, of which \$0.8 million was paid from escrow in September 2003. Accordingly, for book purposes, \$1.0 million of escrow remains available to apply against future claims that may arise from Emcor in connection with this transaction. We recorded a tax benefit of \$1.4 million related to this additional charge. In addition, the \$1.2 million charge recognized during the fourth quarter of 2002 is also net of a tax credit of \$1.3 million as a result of lower final tax liabilities in connection with the overall Emcor transaction than we estimated when the transaction originally closed in the first quarter of 2002.

Outlook—As noted earlier in this review, while we see signs that industry activity levels may increase in 2004, our primary emphasis for the upcoming year is on margin improvement rather than revenue growth. Our ongoing margin improvement efforts include a focus on reducing the number of our units with significantly decreased operating results or losses in 2004 as compared to 2003, and intensified project and service performance training at the unit level. Also as noted above, following the difficult operating conditions of the last three years, our ongoing operations posted year-over-year revenue increases in the third and fourth quarters of 2003 along with an essentially flat operating income comparison in the third quarter and an increase in the fourth quarter. Our first quarter results also showed respectable gains. Based on these efforts and developments, and on our expectation that industry and economic conditions will improve in 2004, we believe that our 2004 results will be significantly better than our 2003 results, although there can be no assurance that we will achieve this outcome.

Three Months Ended

Cash Flow—We define free cash flow as cash provided by operating activities excluding items related to sales of businesses, less customary capital expenditures, plus the proceeds from asset sales. Positive free cash flow represents funds available to invest in significant operating initiatives, to acquire other companies or to reduce a company's outstanding debt or equity. If free cash flow is negative, additional debt or equity is generally required to fund the outflow of cash. Free cash flow may be defined differently by other companies.

Our business does not require significant amounts of investment in long-term fixed assets. The substantial majority of the capital used in our business is working capital that funds our costs of labor and installed equipment deployed in project work until our customers pay us. Customary terms in our industry allow customers to withhold a small portion of the contract price until after we have completed the work, typically for six months. Amounts withheld under this practice are known as retention or retainage. Our average project duration together with typical retention terms generally allow us to complete the realization of revenue and earnings in cash within one year. Accordingly, we believe free cash flow, by encompassing both profit margins and the use of working capital over our approximately one-year working capital cycle, is an effective measure of operating effectiveness and efficiency. We have included free cash flow information here for this reason, and because we are often asked about it by third parties evaluating the Company. However, free cash flow is not considered under generally accepted accounting principles to be a primary measure of an entity's financial results, and accordingly free cash flow should not be considered an alternative to operating income, net income, or amounts shown in our consolidated statements of cash flows as determined under generally accepted accounting principles.

For the three months ended March 31, 2004, we had negative free cash flow of \$5.9 million following very strong fourth quarter 2003 cash flow, as compared to positive free cash flow of \$7.0 million during the first quarter of 2003. This decrease resulted from the requirement of \$8.4 million in working capital primarily relating to early buying of metal commodities for projects due to volatile conditions in the markets for these materials, and funding of year end compensation accruals. This compares to a recovery of \$6.2 million of working capital from our operations in the first quarter of 2003 following comparatively low cash flow in the fourth quarter of 2002.

During the first quarter of 2003, free cash flow as well as borrowings from our credit facility were used to pay final tax payments of \$10.4 million associated with the sale of the operations to Emcor.

Credit Facility—On December 31, 2003, we entered into a \$50 million senior credit facility (the "Facility") provided by a syndicate of four banks. The Facility is secured by substantially all of our assets,

including the capital stock of all our current and future subsidiaries and substantially all of their assets. Amounts due under the Facility are also guaranteed by our current and future subsidiaries. The Facility consists of two parts: a term loan and a revolving credit facility.

The term loan under the Facility (the "Term Loan") is \$10 million, which the Company borrowed upon the closing of the Facility. The Term Loan must be repaid in quarterly installments over five years. The Facility requires prepayments of the Term Loan in certain circumstances. Proceeds in excess of \$1 million from the sale of an asset, or from a related series of asset sales, must be used to pay down the Term Loan. Asset sale proceeds of less than \$1 million must also be used to pay down the Term Loan unless they are reinvested in long-term assets within six months of being received. All principal payments under the Term Loan permanently reduce the original \$10 million capacity under this portion of the Facility.

The Facility also includes a three-year \$40 million revolving credit facility (the "Revolving Loan") available for borrowings or letters of credit. Letters of credit are discussed at greater length below under *Off-Balance Sheet Arrangements and Other Commitments*. The Facility requires that borrowings outstanding under the Revolving Loan must be less than \$2 million for ten consecutive business days at least once during each year. We have already satisfied this condition for 2004.

Our borrowings and letters of credit outstanding under the Facility at each monthend must be less than a borrowing base measured as of the same monthend. The borrowing base is defined under the Facility as 60% of the following: total trade receivables, less allowances for doubtful accounts, less receivables related to projects that are subject to payment or performance bonds. The borrowing base as of March 31, 2004 was \$77 million. We expect that our borrowing base will continue to exceed the \$50 million stated limit of the Facility by significant amounts.

Our borrowing and letter of credit capacity under the Revolving Loan portion of the Facility at any given time is \$40 million less borrowings and letters of credit outstanding, subject to the borrowing base described above. The Facility contains financial covenants defining various financial measures and the levels of these measures with which we must comply, as discussed further below. Covenant compliance is measured as of each quarterend. While the Facility's financial covenants do not specifically govern capacity under the Facility, if our debt level under the Facility at a quarterend covenant compliance measurement date caused us to violate the Facility's debt-to-EBITDA covenant (described in more detail below) our borrowing capacity under the Facility could be restricted by the lenders. Accordingly, available capacity amounts shown below are presented both on a financial covenant basis and on a Facility face value basis.

	As of March 31, 2004		As of April 29, 2004	
		(in thou	ısands)	
Amounts Outstanding				
Revolving loan	\$	_	\$	_
Term loan		10,000		9,500
Other debt		382		380
Total debt	\$	10,382	\$	9,880
Letters of credit	\$	20,499	\$	20,387
Available Capacity				
Unused revolving loan and letter of credit capacity based on revolving loan				
face value of \$40 million	\$	19,501	\$	19,613
Unused revolving loan and letter of credit capacity based on quarterend debt-		40.504		
to-EBITDA covenant	\$	19,501		n/a

The Facility contains financial covenants defining various financial measures and the levels of these measures with which we must comply. Covenant compliance is assessed as of each quarterend. Earnings

before interest, taxes, depreciation and amortization ("EBITDA") is defined under the Facility for financial covenant purposes as net earnings for the four quarters ending as of any given quarterly covenant compliance measurement date, plus the corresponding amounts for (a) interest expense; (b) income taxes; (c) depreciation and amortization; and (d) other non-cash charges. The Facility also stipulates EBITDA for the first three quarters of 2003 as follows: (\$2.8) million for the first quarter; \$5.7 million for the second quarter; and \$8.0 million for the third quarter. The Facility's principal financial covenants include:

Debt Service Coverage Ratio—The Facility requires that the ratio of EBITDA to the sum of interest expense and scheduled principal payments be at least 2.50. Interest expense is defined under the Facility for purposes of this covenant as interest expense for the four quarters ending as of any given quarterly covenant compliance measurement date, excluding corresponding twelve-month amounts for (a) amortization of deferred debt arrangement costs; and (b) mark-to-market interest expense. Scheduled principal payments for this ratio are also measured for the twelve months ending as of any given quarterly covenant compliance measurement date. The Facility provides, however, that during the first three quarters of 2004, interest expense and scheduled principal payments used in this ratio will be the annualized amounts of actual year-to-date interest expense and scheduled principal payments, instead of actual amounts for these items for the twelve months then ended. The Company's debt service coverage ratio as of March 31, 2004 as measured under this covenant was 6.21.

Tangible Net Worth—The Facility requires that our tangible net worth not be less than the sum of (a) \$75.4 million; (b) 75% of net income earned beginning October 1, 2003; and (c) the net proceeds of any equity transactions. For purposes of this ratio, the Facility defines tangible net worth as stockholders equity less the book value of the following intangible assets: goodwill, patents, copyrights, licenses, franchises, trade names, trade secrets, and operating leases. The Facility also provides that for purposes of this ratio, net income excludes any goodwill impairment charges. The Company's tangible net worth as of March 31, 2004 as measured under this covenant was \$98.7 million, as compared to a covenant requirement of \$78.0 million.

Debt to EBITDA—The Facility requires that our ratio of debt to EBITDA not exceed 2.0. Our debt-to-EBITDA ratio as of March 31, 2004 as measured under this covenant was 0.46.

Capital Expenditures—The Facility limits capital expenditures to \$8.0 million per year. Our capital expenditures during the three months ended March 31, 2004 were \$1.3 million.

Other Restrictions—The Facility prohibits payment of dividends and repurchase of shares by the Company, and limits non-Facility debt, capital lease obligations, acquisitions, investments, and sales of assets. The Facility also includes a customary provision under which the lenders may demand immediate repayment of borrowings and disposition of letters of credit if they conclude that our business or financial position has suffered a material adverse change. However, the Facility does not include any mechanisms allowing the lenders immediate access to our ongoing cash flow in the event of a default or an immediate repayment demand by the lenders. In view of our financial position, and what we believe are our prospects for profitability and positive cash flow in the future, we believe that the probability that our lenders will invoke the material adverse change provision of the Facility in the foreseeable future is remote. As a result, debt under the Facility is classified as long-term, other than amounts due within one year.

Off-Balance Sheet Arrangements and Other Commitments—As is common in our industry, we have entered into certain off-balance sheet arrangements in the ordinary course of business that result in risks not directly reflected in our balance sheets. Our most significant off-balance sheet transactions include liabilities associated with noncancelable operating leases. We also have other off-balance sheet obligations involving letters of credit and surety guarantees.

We enter into noncancelable operating leases for many of our facility, vehicle and equipment needs. These leases allow us to conserve cash by paying a monthly lease rental fee for use of facilities, vehicles and equipment rather than purchasing them. At the end of the lease, we have no further obligation to the lessor. If we decide to cancel or terminate a lease before the end of its term, we would typically owe the lessor the remaining lease payments under the term of the lease.

Certain of our vendors require letters of credit to ensure reimbursement for amounts they are disbursing on our behalf, such as to beneficiaries under our self-funded insurance programs. We have also occasionally used letters of credit to guarantee performance under our contracts and to ensure payment to our subcontractors and vendors under those contracts. The letters of credit we provide are actually issued by our lenders through our Credit Facility as described above. A letter of credit commits the lenders to pay specified amounts to the holder of the letter of credit if the holder demonstrates that we have failed to perform specified actions. If this were to occur, we would be required to reimburse the lenders. Depending on the circumstances of such a reimbursement, we may also have to record a charge to earnings for the reimbursement. Absent a claim, there is no payment or reserving of funds by the Company in connection with a letter of credit. However, because a claim on a letter of credit would require immediate reimbursement by us to our lenders, letters of credit are treated as a use of Credit Facility capacity just the same as actual borrowings. Claims against letters of credit are rare in our industry. To date we have not had a claim made against a letter of credit that resulted in payments by our lenders or by us. We believe that it is unlikely that we will have to fund claims under a letter of credit in the foreseeable future.

Many customers, particularly in connection with new construction, require us to post performance and payment bonds issued by a financial institution known as a surety. These bonds provide a guarantee to the customer that we will perform under the terms of a contract and that we will pay subcontractors and vendors who provided goods and services under a contract. If we fail to perform under a contract or to pay subcontractors and vendors, the customer may demand that the surety make payments or provide services under the bond. We must reimburse the surety for any expenses or outlays it incurs. To date, we are not aware of any losses to our surety in connection with bonds the surety has posted on our behalf, and we do not expect such losses to be incurred in the foreseeable future.

Surety market conditions are currently difficult as a result of significant losses incurred by many sureties in recent periods, both in the construction industry as well as in certain larger corporate bankruptcies. As a result, less bonding capacity is available in the market and terms have become more restrictive. Further, under standard terms in the surety market, sureties issue bonds on a project-by-project basis, and can decline to issue bonds at any time. Historically, approximately 25% of our business has required bonds. While we have enjoyed a longstanding relationship with our surety, current market conditions as well as changes in our surety's assessment of our operating and financial risk could cause our surety to decline to issue bonds for our work. If that were to occur, our alternatives include doing more business that does not require bonds, posting other forms of collateral for project performance such as letters of credit or cash, and seeking bonding capacity from other sureties. We would likely also encounter concerns from customers, suppliers and other market participants as to our creditworthiness. While we believe our general operating and financial performance would enable us to ultimately respond effectively to an interruption in the availability of bonding capacity, such an interruption would likely cause our revenues and profits to decline in the near term.

The following recaps the future maturities of our debt along with other contractual obligations. Debt maturities in this recap are based on amounts outstanding as of April 29, 2004 while operating lease maturities are based on amounts outstanding as of March 31, 2004 (in thousands):

Twelve	Months	Ended	March 31.

		2005		2006		2007		2008		2009		Thereafter	_	Total
Revolving loan	\$	_	\$	_	\$	_	\$	_	\$	_	\$	_	\$	_
Term loan		1,500		2,000		2,000		2,000		2,000		_		9,500
Other debt		91		65		58		58		58		50		380
Total data		1.501	<u> </u>	2.065	<u> </u>	2.050	<u> </u>	2.059		2.059	<u> </u>	50	-	0.000
Total debt	Þ	1,591	3	2,065	\$	2,058	\$	2,058	3	2,058	\$	50	Э	9,880
	_													
Operating lease obligations	\$	8,103	\$	7,052	\$	5,514	\$	4,759	\$	4,836	\$	11,742	\$	42,006

As of March 31, 2004 we also have \$20.5 million of letter of credit commitments. While these commitments all expire in 2004, we expect the majority of them, primarily those supporting our property and casualty insurance programs, will be renewed annually.

Other than the operating lease obligations noted above, we have no significant purchase or operating commitments outside of commitments to deliver equipment and provide labor in the ordinary course of performing project work. In addition, Other Long-Term Liabilities on our balance sheet include \$3.1 million associated with a warrant and put obligation. This amount substantially reflects the value of the warrant portion of the obligation that can be converted into equity by the holder. Because this conversion would not require a cash disbursement, we have not included this obligation in the table of commitments above

Outlook—We have generated positive net free cash flow in twelve of the last sixteen quarters in challenging economic and industry conditions, and we currently have a relatively low level of debt. We anticipate that free cash flow from operations and credit capacity under the Facility will provide us with sufficient liquidity to fund our operations for the foreseeable future.

Seasonality and Cyclicality

The HVAC industry is subject to seasonal variations. Specifically, the demand for new installation and replacement is generally lower during the winter months (the first quarter of the year) due to reduced construction activity during inclement weather and less use of air conditioning during the colder months. Demand for HVAC services is generally higher in the second and third calendar quarters due to increased construction activity and increased use of air conditioning during the warmer months. Accordingly, we expect our revenues and operating results generally will be lower in the first and fourth calendar quarters.

Historically, the construction industry has been highly cyclical. As a result, our volume of business may be adversely affected by declines in new installation and replacement projects in various geographic regions of the United States.

New Accounting Pronouncements

In January 2003, the Financial Accounting Standards Board ("FASB") issued Interpretation 46, "Consolidation of Variable Interest Entities" ("FIN 46"). FIN 46 defines a variable interest entity as an entity in which equity investors do not have the characteristics of a controlling financial interest or do not have sufficient equity at risk for the entity to finance its activities without additional financial support from other parties. FIN 46 requires an investing entity to consolidate a variable interest entity if that investing entity will absorb a majority of the variable interest entity's expected residual returns if they occur, or both. FIN 46 is effective for all new variable interest entities created or acquired after January 31, 2003. For variable interest entities created or acquired prior to February 1, 2003, the provisions of the pronouncement were initially to be effective for the first interim or annual period beginning after June 15, 2003. However, in October 2003,

the FASB delayed the effective date of FIN 46 on these entities to the first period ending after March 15, 2004. We determined that we do not have any variable interest entities.

ITEM 3. Quantitative and Qualitative Disclosures about Market Risk

We are exposed to market risk primarily related to potential adverse changes in interest rates. Management is actively involved in monitoring exposure to market risk and continues to develop and utilize appropriate risk management techniques. We are not exposed to any other significant financial market risks including commodity price risk, foreign currency exchange risk or interest rate risks from the use of derivative financial instruments. Management does not use derivative financial instruments for trading or to speculate on changes in interest rates or commodity prices.

ITEM 4. Controls and Procedures

The Company's executive management is responsible for insuring the effectiveness of our disclosure controls and procedures. We carried out an evaluation under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934) as of the end of the most recent fiscal year. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures are effective to ensure that information required to be disclosed by us in reports that we file or submit under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported in accordance with and within the time periods specified in Securities and Exchange Commission rules and forms. There has been no change in our internal control over financial reporting during the three months ended March 31, 2004 that has materially affected, or is reasonably likely to materially affect, internal control over financial reporting.

COMFORT SYSTEMS USA, INC. PART II—OTHER INFORMATION

Item 1. Legal Proceedings

The Company is party to litigation in the ordinary course of business. The Company has estimated and provided accruals for probable losses and related legal fees associated with certain of these actions in the accompanying consolidated financial statements. The Company has one project-related claim that was subject to binding arbitration proceedings in the first half of 2004. The Company expects a final decision on this matter during the second quarter of 2004. With respect to this claim, and as with all such matters, the Company has accruals that reflect its judgment of the outcome. Because of this, in management's opinion, uninsured losses resulting from the ultimate resolution of these matters will not have a material adverse effect on the Company's operating results or financial condition.

Item 2. Recent Sales of Unregistered Securities

None.

Item 6. Exhibits and Reports on Form 8-K

- (a) Exhibits
 - 10.1 Amendment to the Comfort Systems USA, Inc. 1997 Long-Term Incentive Plan dated March 31, 2004.
 - 31.1 Rule 13a-14(a) Certification of William F. Murdy pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
 - 31.2 Rule 13a-14(a) Certification of J. Gordon Beittenmiller pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
 - 32.1 Section 1350 Certification of William F. Murdy pursuant to Section 906 of the Sarbanes-Oxley Act of 2002
 - 32.2 Section 1350 Certification of J. Gordon Beittenmiller pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
- (b) Reports on Form 8-K
 - (i) The Company filed a report on Form 8-K with the Securities and Exchange Commission on March 1, 2004. Under Item 7 of that report the Company announced that on February 27, 2004, the Company issued a press release, reporting Comfort's financial results for the fourth quarter of 2003 and for the year 2003.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

Exhibit 10.1

COMFORT SYSTEMS USA, INC. 1997 LONG-TERM INCENTIVE PLAN Amendment

Pursuant to Section 8(e) of the Comfort Systems USA, Inc. 1997 Long-Term Incentive Plan (the "Plan") and pursuant to a vote of the Board of Directors of Comfort Systems USA, Inc., the Plan has been amended as follows, effective as of March 31, 2004:

1. Section 8(1) of the Plan is amended in its entirety to read as follows:

"(1) EFFECTIVE DATE; PLAN TERMINATION. The Plan shall become effective as of the date of its adoption by the Board (the "Adoption Date"), subject to stockholder approval prior to the commencement of the Initial Public Offering, and shall continue in effect until the date ten years from the Adoption Date (the "Termination Date"). No Award may be granted under the Plan after the Termination Date, but Awards previously granted may extend beyond the Termination Date."

IN WITNESS WHEREOF, Comfort Systems USA, Inc. has caused this instrument to be executed by its duly authorized officer this 31st day of March, 2004.

COMFORT SYSTEMS USA, INC.

By: /s/ WILLIAM GEORGE

William George Senior Vice President and Secretary

Exhibit 10.1

RULE 13a-14(a) CERTIFICATION IN ACCORDANCE WITH SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

- I, William F. Murdy, Chairman of the Board and Chief Executive Officer of Comfort Systems USA, Inc. (the "Company"), certify that:
- 1. I have reviewed this quarterly report on Form 10-Q of the Company;
- 2. Based on my knowledge, this quarterly report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this quarterly report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this quarterly report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this quarterly report;
- 4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-14 and 15d-14) for the registrant and have:
- (a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
- (b) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
- (c) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent functions):
- (a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
- (b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
